General

Summary

All campaign related ores can be mined with simple-crystals.

mess below!

Math

Best reprocessing skills and beancounter 4% implant in HS in a Tatara with T2 rigs can bring the refinement rate to 80.92%.

X-type ore

Mineral	Amount / 100	Refined HS	Refined LS
Tritanium	1000	809	
Pyerite	750	607	
Trade mineral	90	73	

45000 units of trade mineral for 1 token
10k units of trade is 4k LP, 2.7m ISK and 0.22 tokens = 8.45m = 845 ISK/mineral

SARO Ore Holding

General

SARO Ore Holding sites (anomaly) spawn in Highsec and Lowsec based on EVE Vanguard activity. Highsec sites provide x-grade ore for all 4 factions, Lowsec sites provide z-grade ore for all factions. Sites can be found using the ingame map with the activity filter set to "SARO Black Sites".

Reserve sites

Summary

Reserve sites spawn in bulwark systems and exist in 4 different variations:

- Imperial Raspite Reserve
- Federal Moissanite Reserve
- Republic Kagnite Reserve
- State Polycrase Reserve

Bulwark mining sites can be found using the map's mining filter and then select "Bulwark Mining Sites"
