

Crypto Facility

Level 4 data signature spawning in **NS** volatile ice storms and hosting 1 canister that can be hacked (data) immediately.

The 2nd can can only be hacked after depositing a **Cryostatic Suppressor** into Sansha's Stormfield Projector. More info on how to obtain those items can be found [here](#)

Information on loot-runs for these sites can be found [EVE Journal](#).

Completing the event-track through non-upgraded NS sites, yields about 1b ISK of loot (on top of the event-track rewards). Takes about 3.5 hours without competition.
