# Summary

Completing expeditions in Vanguard spawns investigations in known space (HS/LS/non-sov NS) in EVE Online.

Systems with active investigation spawn combat, hacking and salvaging sites. The hacking sites have to be probed down.

AEGIS Squalls are spawning in investigation systems. Combat probing them and following them around may reveal additional locations for investigation sites with better loot (and maybe harder combat?).

Running any investigation related site adds influence in the system. Once influence is at 100% a Nemesis combat site spawns. Completing the site removes the investigation and all of its sites from the system.

Fit working for all sites, incl. POIs: [Proteus](#)

Fit for AEGIS Joint Operation Center only: [Gila](#)

# Boosters

All boosters will expire July 27th.

Name	Slot	Description
Cavalry Clash Booster	16	+20% Warp Speed, -12% Ship Inertia, Base duration: 10 minutes.
Astrograph Clash Booster	14	+20% Scan Probe Strength, +20% Scan Resolution. Base duration: 10 minutes.
SITREP Fleeting Booster	15	+20% D-Scan Range. Base duration: 10 minutes.
Coherence Volatile Booster	16	+20 Analyzer Coherence, +20 Analyzer Strength. Base duration: 3.5 minutes.
Upcycle Volatile Booster	16	-20% Salvage Duration. Base duration: 3.5 minutes.

# Speedrun the event track

Completing an assignment in Vanguard progresses the "Complete 6 Vanguard expeditions" task by one point.

There are 2 Vanguard Expeditions which have very easy/fast assignments.

Log in all 3 EVE characters on the account you want to progress the EVE Online event track for, **BEFORE** you do the assignments in EVE Vanguard. Open the event track with each character. After that, the EVE client can be closed. This ensures that all 3 characters can be progressed at the same time!

To begin, accept the "**Avalon Rises**" Expedition in EVE Vanguard and activate the first assignment which requires you to kill 3 NPCs and loot 6 boxes (looting empty boxes as well panels works too). Once the assignment is done, extract/die and complete assignment in the warbarge. Now **ABANDON\*** the expedition and accept it again. Rinse repeat until you did it 6 times. Then log in to the EVE Online characters to claim the task. Do that 4 times in total and all 3 EVE characters will have completed the event.

There's a secondary Expedition that can help speed this up even more. Looting the boxes may award "Intel Fragment", "Insulated Cabling", "Silicate Circuitry" and "Flux Coil". Expedition "**Beneath The Garden**" has two assignments for turning in these.
