

Speedrun the event track

Completing an assignment in Vanguard progresses the "Complete 6 Vanguard expeditions" task by one point.

There are 2 Vanguard Expeditions which have very easy/fast assignments.

Log in all 3 EVE characters on the account you want to progress the EVE Online event track for, **BEFORE** you do the assignments in EVE Vanguard. Open the event track with each character. After that, the EVE client can be closed. This ensures that all 3 characters can be progressed at the same time!

To begin, accept the "**Avalon Rises**" Expedition in EVE Vanguard and activate the first assignment which requires you to kill 3 NPCs and loot 6 boxes (looting empty boxes as well panels works too). Once the assignment is done, extract/die and complete assignment in the warbarge. Now **ABANDON*** the expedition and accept it again. Rinse repeat until you did it 6 times. Then log in to the EVE Online characters to claim the task. Do that 4 times in total and all 3 EVE characters will have completed the event.

There's a secondary Expedition that can help speed this up even more. Looting the boxes may award "Intel Fragment", "Insulated Cabling", "Silicate Circuitry" and "Flux Coil". Expedition "**Beneath The Garden**" has two assignments for turning in these.

A third Expedition called "**The Wager**" let's you turn in Sec-5 Command Implants which drop from commanders. If you happen to kill some, this will help speed-run this too.
