

(Minmatar) Stop the Sabotage

Strategy (based on the fittings below):

1. Turn on the shield resistance modules of the 3 hacking ships
2. Enter the site with all 5 ships, the hacking Moa first
3. Keep at range 2km of hacking container B (closest to warp in) with the hacking Moa and turn on the afterburner
4. Keep at range 2km of hacking container A and C with the Ospreys and turn on their afterburner
5. Establish the cap-chain between the two Ospreys (large energy transfer)
6. Send the 2 polarized Moas into a 500m orbit of the target structure
7. Start repping the fleet-member that is attacked, if it's one of the polarized Moas, send all remote reps, otherwise 1-2 should suffice. Also, if there is heavy neuting, send the small energy transfers to the attacked fleet member.
8. The hacking Moa should be at B now, prepare the hack (so there's one click left to destroy the core)
9. Prepare hack A and C as soon as the Ospreys are in range.
10. Finish all hacks, then target the structure and start shooting with the polarized Moas first, followed by the hacking Moa.
11. During the 90 seconds damage window, loot the hacked cans for additional NPC sold items
12. After 90 seconds, proceed to step 8. Repeat until the structure is destroyed

With max damage-skills and proper execution, the structure can be killed within 2 vulnerability windows, which should complete the site in just under 5 minutes.

NPCs

Name	Info	Dmg to do (structure)	Dmg to tank (from NPCs)
Obscurer  Crucifier  Arbitrator	Guidance and weapon disruption	   	 

Name	Info	Dmg to do (structure)	Dmg to tank (from NPCs)
Quietus  Retribution  Dragoon  Zelot	Neuting		
Justifier  Inquisitor  Augoror	Logi (armor)		
Infiltrating  Coercer  Punisher	Drone aggro (test)		
Saboteur  Omen	DPS		
Proselytizer  Oracle	DPS
