Summary (click me!)

Yoiul LADs roam through systems affected by volatile ice storms and can drop **Verity Cryo Tech,** modifier items for either combat-, data- or ice mining sites, unlocking increased difficulty and better loot.

LADs can be combat probed & d-scanned. Make sure "**InterBus Yoiul LADs**" are enabled in your overview!

To catch and hold a LAD, a **warp disruptor** is required, LADs intend to warp between celestials and stations every 30-60 seconds.
